Part B: Contractor Building Details

Legend:

: New Design

: Old Building

Main Scope of Contractor:

1. Extend the portion of the building drawn with red with complete roof and drainage system
2. All construction materials to be of metal (steel and aluminum) – no wood should be used for any purpose
3. Upgrade and extend the power cable and control cable trenches as shown above
4. Construct a wall as shown in the design for battery and SCADA room
5. Remove a portion of a wall as shown in the design to connect the new extension to the building
6. Build and install 2 single doors and 1 double door as shown in the design
7. Capacitor bank H-poles to be relocated to the new location as shown in the design by FEA team
